

Names:

NetIDs:

1.) Working alongside your neighbors, explain what Q, K, and V are in relation to self-attention. What makes the self-attention mechanism better than RNNs/LSTMs/GRUs?

A.) see quiz 10

B.) we can compute this  
all at once in parallel  
unlike RNNs which need  
to be done sequentially

2.) Give your partners a high five and wish them a Merry Christmas!

Merry Christmas!
